EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with David A. Blumenthal on April 12, 2005.

The application has been amended as follows:

In the Claims:

7. (currently amended) The packet processing apparatus according to claim 6 19, further comprising: an IEEE 1394 packet transmitter for transmitting the IEEE 1394 packet; an IEEE 1394 packet receiver for receiving the IEEE 1394 packet; an IP packet extractor for extracting the IP packet from the received IEEE 1394 packet; an IP packet processor for referring to a routing table set/updated by the ARP processing from the extracted IP packet, adding predetermined transfer destination information, and instructing encapsulation of the IP packet into the IEEE 1394 packet; an address table for receiving a transmission processing notice from said IEEE 1394 packet transmitter, and including attribute information indicating presence/absence of continuous transmission of the IP packet as the entry; a transmission monitor for searching the information of said address table at a fixed interval, and judging, in accordance with the searched information, whether establishment of an asynchronous channel is necessary or unnecessary with respect to the data flow; a CMP processor for obtaining a

corresponding isochronous channel number, and a band from an isochronous channel establishment request transmitted from said transmission monitor, and registering the obtained channel information into said address table; and means for referring to the information of said address table to encapsulate the IP packet to be transmitted in the IEEE 1394 packet, and using said established communication channel to generate the isochronous packet.

19. (new) The packet processing apparatus according to claim 4 wherein said transmission monitor comprises: units for initializing a packet flag of the address table to set to predetermined value every time a processing of searching the address table is performed at a predetermined time interval; and units for initializing a counter value for the entry when the packet flag of the entry of said address table remains to be said value in the next search processing.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Melvin Marcelo whose telephone number is 571-272-3125. The examiner can normally be reached on Mon-Fri 8:30-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Hassan Kizou can be reached on 571-272-3088. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
